

## **Introduction**

The water bibliography contains sections on Water Flow, Water Quality, Water Treatment, Water Management, Watersheds, Wastewater, Aquifer, Groundwater Testing, and River Diversion. Each section is contained in a separate file in Microsoft Word. A search was also made for Water Pricing, but no records were found.

The bibliography was compiled by GTS Group International of Edmonton, Alberta under a contract funded by the Northern Alberta Development Council.

All libraries in the province of Alberta were searched. This included all public libraries, all provincial government libraries, and all of the libraries at universities and colleges. The search was undertaken on a library basis, and within each category, the publications are listed by library.

The records in the bibliography pertain primarily to Northern Alberta, but also contain records pertaining to Central and Southern Alberta. The records contain publications going back to the 1970s and up to the present time. Several major water studies and series of studies are included, including lake monitoring programs, the health of several river systems, water pollution and quality issues in the Fort McMurray area, environmental impact assessments for new plant/facility construction, and water effluent reports by a major forestry producer. There are also records pertaining to water-related provincial regulations, programs, and initiatives. In effect, the bibliography contains a comprehensive record of water-related work and issues in Alberta over the past 35 years or so.

In all, there are more than 4,200 records in the bibliography. There is overlap and duplication of records due to publications dealing with several of the topics in the bibliography, and the fact that publications were held by several of the libraries searched.

## **Abbreviations: Water Bibliography**

Alk. Paper = alkaline paper

Bdg. = binding

Cat. No. = catalog number

cm = centimeter

col. = colour

et al. = and all

Fold. = folding

Facsim = facsimiles

Fr. = frame

Gov. Doc. No. = government document number

ill. = illustrated

in. = inch

ISBN = International Standard Book Number

No. = number

p. = pages

Pbk. = paperback

Pt. = part

Pub. No. = publication number

Rev. ed. = revised edition

Roman numerals = foreword or executive summary number of page

v. = volume

vol. = volume

## **Aquifer**

**Contents:** Keynote address. Limits of limit equilibrium analysis -- Session 1.1. Centrifuge modelling of pipeline frost heave -- 1.2. Geological controls on directionally drilled pipeline installations in northeastern Alberta -- 1.3. Horizontal directional drilling fluids from a geotechnical perspective -- 2.1. Well water quality in Canada: an overview -- 2.2. Hydrogeological investigations of municipal groundwater supply following the Walkerton e. coli tragedy -- 2.3. Microbiological quality of drinking water in Canada: an overview of the Health Canada programme -- 2.4. Changes in groundwater quality in an intensive agricultural area of southern Alberta, Canada. Session 3.1. Bioreactor landfill design and operation -- 3.2. A geographic information system (GIS) approach for quantifying source strength of methane gas at landfills -- 3.3. Hydraulic conductivity of compacted clay liners: field testing and data interpretation -- 3.4. Hydraulic conductivity of compacted clay liners at two Calgary landfill sites -- 4.1. From subsea to submerged floating tunnels -- 4.2. Boundary conditions in small-scaled tunnel excavation model -- 4.3. Ground response associated with a drill-and-blast shallow tunnel -- 4.4. 3-D analysis on the performance of a grouted tunnel. Session 5.1. Towards a regional hydrogeologic framework for groundwater development and conservation, Athabasca and Cold Lake oil sands areas, Alberta -- 5.2. The glacio-stratigraphic organization of tertiary and quaternary sediments in the Athabasca oilsands (in situ) area, Alberta: implications for groundwater exploration -- 5.3. A multidisciplinary approach to resolving complex hydrogeologic systems -- 5.4. Hydrogeology of the southeastern Athabasca area: challenges for bitumen production -- 5.5. Quaternary aquifer water level changes caused by stress changes -- 5.6. Study of chloride migration in Cold Lake, Alberta, Canada -- 5.7. Identifying the source of dissolved hydrocarbons in aquifers using stable carbon isotopes -- 5.8. Aquifer depressurization and dewatering at Syncrude's Aurora Mine - an update. Session 6.1. Pearl Harbor & Midway - lessons for geotechnical engineers -- 6.2. A case study: geoenvironmental site investigation for interchange area of Highway 15 and Trans Canada Highway 1, British Columbia -- 6.3. Baxter Bridge - a case with history -- 6.4. Effective rock blasting and vibration control program saves adjoining plant in southwest Florida - a case study -- 7.1. The future of Canadian gasoline additives from a groundwater perspective -- 7.2. Investigation of a creosote plume underneath a large tidally influenced river -- 7.3. Inhibitory effect of noncoliforms on total coliform enumeration in manure impacted groundwater -- 7.4. Identification of high-fluoride groundwater provinces, Alberta, Canada. Session 8.1. Detailed construction procedures and considerations in Syncrude's quasi-homogeneous earthfill dams -- 8.2. A geotechnical performance review of the Mildred Lake East Toe Berm -- 8.3. Monitoring the movements of Maroon Dam -- 8.4. Stability of dykes

at Seven Sisters generating station -- 9.1. Effect of plugging on pile performance -- 9.2. Interaction between end bearing and shaft-resistance of piles -- 9.3. Helical piles in soft sensitive soils - disturbance effects during pile installation -- 9.4. Performance of model tapered piles in sand. Session 10.1. Performance of a quasi-homogenous earthfill dam retaining 35 m of tailings fluid with no filters or clay core: Syncrude's highway berm -- 10.2. Investigation of groundwater flow within an oil sand tailings impoundment and environmental implications -- 10.3. Water balance for reclamation covers on oilsands mining overburden piles -- 10.4. Geotechnical aspects of several recent mine tailings impoundment failures -- 10.5. Evaluation des deformations d'un grand barrage en terre et en enrochement pendant sa mise en eau -- 11.1. Anisotropic fracture networks: a new evaluation methodology -- 11.2. Characterization of sheared joint surface degradation -- 11.3. Blast damage assessment at the Ekati[™] Diamond Mine -- 11.4. Swelling strains and movement rates in weak rocks. Session 12.1. Landslides, landslide dams, and the geomorphology of tributaries in the Peace River lowland, Alberta -- 12.2. Geomorphology and slope instability features in the Outardes delta area, Quebec, Canada -- 12.3. Slope stability - study of a real landslide in Tabriz -- 12.4. Slope stabilization using drilled shafts at CP Railway's track in southern Ontario -- 13.1. Field manifestations of gravity-driven regional flow of groundwater: theory, examples, and utilization -- 13.2. Exploring the dynamics of groundwater and climate interaction -- 13.3. Simulation of brine transport in heterogeneous media from a potash tailings pond -- 13.4. Measurement methods for evaporative fluxes over the short term. Session 14.1. The characterization of agricultural point source contaminants -- 14.2. Nitrate geochemistry of a regional aquifer in an agricultural landscape, Woodstock, Ontario -- 14.3. Groundwater transport of nutrients under an irrigated , manured field, southern Alberta -- 14.4. Groundwater nitrate concerns and nutrient management and groundwater protection programs in rural Ontario -- 14.5. Groundwater-surface water interaction and nitrate origin in municipal water supply aquifers, San Jose, Costa Rica -- 14.6. Hydraulic performance of a subsurface flow constructed wetland. Session 15.1. Effects of time on in situ test results after ground improvement - new insights from laboratory and field data -- 15.2. Maximized bearing capacity from a single geosynthetic reinforcement layer -- 15.3. Behaviour of full-scale reinforced embankments loaded to failure by a strip footing near the crest -- 15.4. Dynamic compaction of coarse-grained soils - a case history -- 15.5. Distribution of stresses and settlements below floor slabs supported by rammed aggregate piers -- 15.6. Settlement performance of shallow foundations on stone-column-improved ground -- 15.7. Reinforcement of soft cohesive soils with stone columns -- 15.8. Dynamic compaction of clay backfill in a former gravel pit for a tank farm -- 15.9. Plastic concrete elastic and viscoelastic behavior -- 15.10. Observations from grout field trials in outwash sands. Session 16.1. The multiple personalities of groundwater in modern

engineering and environmental practice -- 16.2. Aquifer vulnerability assessment: the first step in developing an aquifer management strategy for the City of Ottawa -- 16.3. Groundwater protection initiatives in Alberta -- 16.4. A regional groundwater management initiative for eastern Ontario -- 16.5. Alberta Environment's role in groundwater management in Alberta -- 16.6. A new method for calculating aquifer capability for subdivision applications. Session 17.1. The geotechnical virtual laboratory update - consolidation -- 17.2. Laboratory measurement of stresses in sand -- 17.3. Effects of aging on the strength characteristics of kaolin-cement mixture: laboratory program and preliminary results -- 17.4. Elastic-plastic deformation of dense sand at high pressure and elevated temperature -- 17.5. One-dimensional soil compression curves: mathematical **Physical Description:** -- 17.6. Influence of particle breakage on mechanical behavior of assemblies of two-dimensional polygon-shaped particles -- 17.7. A simple experimental procedure for determining the fitting parameter,  $k$  for predicting the shear strength of an unsaturated soil. Session 18.1. Characterization of monitored natural attenuation at upstream oil and gas sites in western Canada -- 18.2. Biological activity assessment to support monitored natural attenuation at upstream oil and gas sites in Alberta -- 18.3. Natural attenuation processes in a hydrocarbon-impacted wetland -- 18.4. Natural attenuation of nitroaromatic compounds in soils and groundwater at a production plant -- 18.5 Monitored natural attenuation of diesel fuel contaminating groundwater in a bedrock formation -- 18.6. Evaluation of two techniques to estimate the mass flux of contaminants in groundwater -- Session 19.1. A proposed method for evaluating  $K_o$  in fine grained soils using CPT pore pressure measurements -- 19.2. Reduced scale testing of reinforced soil retaining walls with non-select fills. Session 19.3. The influence of reinforcement stiffness on the performance of full-scale reinforced soil segmental retaining walls -- 19.4. About applications of the dilatometer test in southwestern Ontario soils -- 19.5. Ground interaction effects in uplift pile load tests -- 19.6. Strain localization at interfaces -- Session 20.1. Costa-Canada, a Canadian contribution to the study of continental slope stability: an overview -- 20.2. High-resolution three-dimensional seismic surveying of submarine landslides: rationale and challenges -- 20.3. Submarine failures in the Strait of Georgia, British Columbia: landslides of the 1946 Vancouver Island earthquake -- 20.4. Characterisation préliminaire du glissement sous-marin de la Pointe-du Fort, Fjord du Saguenay, Québec Canada -- 20.5. The efficiency of a catastrophic capping layer deposited in the Saguenay Fjord during the flood of 1996, Québec. Session 20.6. The Saguenay Fjord: integrating marine geotechnical and geophysical data for spatial slope stability hazard analysis -- 20.7. Caractéristiques géotechniques et analyse du potentiel de liquéfaction des sédiments récents et post-glaciaires du Fjord du Saguenay, Québec (Canada) -- 20.8. Slope instability seismic signatures in the quaternary sediments of the St-Lawrence Estuary (Qc. Canada) -- 20.9.

Revue et investigation complémentaire du site du glissement de Saint-Jean-Vianney -- 20.10. Simulating submarine slope instability initiation using centrifuge model testing -- 20.11. Backanalysis of the 1929 Grand Banks submarine slope failure -- 20.12. Le glissement du hudson apron: un exemple d'application de la caractérisation géomécanique des mouvements de masse. Session 21.1. Flow and transport in the capillary fringe with and without surfactant effects -- 21.2. Numerical modeling of three-dimensional variably-saturated flow and transport of dissolved energetic material at an anti-tank range -- 21.3. Role of soil fractions on the contaminant migration in clay barrier -- 21.4. LNAPL migration through heterogeneous media under fluctuating water table conditions -- Session 22.1. Assessing construction and settlement-induced building damage -- 22.2. Horizontal earth pressures for a deep excavation in downtown Calgary -- 22.3. Construction induced settlement of adjacent buildings -- 22.4. A method for the symmetrical foundation plinth calculation -- Session 23.1. A framework for interpretation of instability of slope -- 23.2. A procedure to compare the results of dynamic and pseudo-static slope stability analysis. Session 23.3. Examination of instability in an unsaturated highway cut -- 23.4. Design and installation of Geobrug's Pentifix system for slope stabilization -- Session 24.1. Climate change, permafrost degradation and impacts on infrastructure: two case studies in the Mackenzie Valley -- 24.2. Geotechnical analysis of a frozen tailings dike -- 24.3. Development and application of frozen till dam core drilling method using a refrigerated fluid -- 24.4. Computation of frost table profile using green theorem -- Session 25.1. Time-lapse electrical resistivity monitoring of groundwater remediation -- 25.2. The verification of electrical resistivity imaging in the study of saline and fresh groundwater interaction at Lydden Lake, SK -- 25.3. Deriving Waxman-Smiths parameters for estimating groundwater quality from in-situ electrical conductivity measurements -- 25.4. Soil characterization using static conductivity and permittivity. Session 25.5. Four electrode method for indirect measurement of soil moisture -- 25.6. Detecting ionic contaminants in water using complex permittivity -- 25.7. The use of ground penetrating radar to monitor transient water content changes during an unconfined aquifer pumping test -- 25.8. Rural water supply project: Malawi, Africa -- Session 26.1. Numerical analysis of pressuremeter test data with reference to intermediate principal stress, anisotropy and dilatancy -- 26.2. Residual deformation characteristics of sandy soils under cyclic simple shear -- 26.3. The dynamic property of Ger'ermu wind carried sand -- 26.4. The effect of drainage conditions on liquefaction response of sands -- Session 27.1. Interpretation of an aquifer test at La Grande 1 hydroelectrical project, La Grande complex, Quebec -- 27.2. Essai de pompage dans un aquifère confiné soumis à des effets de marée (pumping test in a confined aquifer influenced by tidal waves). Session 27.3. Analytical solutions for two dimensional steady flow systems through concentric circles of inhomogeneous media -- 27.4.

Fuzzy image method for unsteady well near a linear boundary -- Session 28.1. Investigation of hydraulic properties of regional fractured rock aquifers -- 28.2. Regional groundwater hydrogeochemistry of fractured rock aquifers in south-western Quebec -- 28.3. Groundwater recharge of fractured rock aquifers in south-western Quebec -- 28.4. Experimental study on the hydraulic, chemical and mechanical processes in rock fractures from a mine site -- Session 29.1. Imaging subsurface seepage conditions through the modelling of streaming potential -- 29.2. A spatial flux boundary model for tailings dams -- 29.3. Effects of shear strength anisotropy on stability of earth structures -- 29.4. Development of a spreadsheet for modelling SPT stress wave data. Session 29.5. Application of double-shearing model in deep excavation analysis -- 29.6. Modelisation numerique des ecoulements non satures et theorie des similitudes -- Session 30.1. Large diameter wells for groundwater remediation -- 30.2. Innovative full-scale soil and groundwater remediation at a mall dry cleaners -- 30.3. TCE recovery during in situ flushing: experimental study of the controlling parameters -- 30.4. TCE recovery mechanisms with alcohol and surfactant washing solutions in sand columns -- 30.5. A laboratory study on the degradation of gasoline contamination using Fenton's reagent -- 30.6. Effect of pH enhancement in efficiency of electrokinetic decontamination -- 30.7. Electrokinetic removal of precipitated lead from carbonate-rich illite soil -- 30.8. Using nitroaromatic compounds to investigate the reactivity of carbon on master builders granular iron: implications for contaminant degradation in permeable reactive barriers. Session 30.9. Laboratory investigations of aerobic and anaerobic monoethanolamine biodegradation -- 30.10. Evaluation of intrinsic bioremediation of btex and chlorinated solvents at an old landfill in Cold Lake, Alberta -- Session 31.1. Effects of viscous behaviour of soft foundation soils on reinforced embankments -- 31.2. Flow liquefaction of loose gassy sand under monotonic loading - an effective stress approach -- 31.3. Estimating the in-situ cohesion of Tehran coarse grained cemented alluviums -- 31.4. Determining the stress history of overconsolidated glaciomarine clay; an oedometer test study -- 31.5. Geomechanical behaviour of stiff clays and mudstones as caprocks for geological sequestration of CO<sub>2</sub> -- 31.6. Estimating liquefaction-induced lateral displacements for level ground with a free face from SPT or CPT data. Session 32.1. A review and assessment of the carbon geochemistry and hydrogeological characteristics of a coalbed methane exploration area, SE British Columbia -- 32.2. Numerical modelling of a saline plume in the Mannville Group aquifer, Alberta basin -- 32.3. Origin of anomalous high sulphate groundwater in the carbonate rock aquifer - southern Manitoba -- 32.4. Uranium depositional controls at the Prairie Flats surficial uranium deposit, Summerland, British Columbia -- 32.5. Using isotopic and geochemical characteristics of groundwater to determine the extent of denitrification under a manured field in southern Alberta, Canada -- 32.6. Soil and groundwater characteristics of CFB Shilo ranges, Manitoba --

Session 33.1. Full scale tests on grillage anchor foundations for high voltage transmission lines -- 33.2. Foundation design in floodplain geology at Canmore, Alberta. Session 33.3. Dynamic response analysis of foundations for vibration-sensitive equipment -- 33.4. Deflection (strain) based haul road designs -- 33.5. Installation of sensors and measurement of soil suction below thin membrane surface pavements in Saskatchewan -- 33.6. Recycling of shredded rubber tires as road base in Manitoba: a case study -- Session 34.1. Challenges in sustaining water well infrastructure on the Canadian prairies -- 34.2. Comparative study of methods for well head protection area delineation in fractured rocks -- 34.3. Defaults de scellement des piezometres, courts-circuits hydrauliques et consequences (inadequate sealing of monitoring wells, hydraulic short-circuits and consequences) -- 34.4. Effects of purging on groundwater analyses: a case study in Alberta -- 34.5. The applicability of shock chlorination to reduce coliform exposure in drinking water wells. Session 34.6. Groundwater aspects of Canadian assisted development, Tibet -- Session 35.1. Conceptual model for the structurally complex, bedrock-controlled groundwater flow system on the southern Gulf Islands, British Columbia -- 35.2. The role of groundwater in the montane ecoregion, Canmore corridor, Alberta -- 35.3. Focused groundwater recharge under micro depressions on hummocky terrain -- 35.4. Variability in the barometric efficiency of quaternary till deposits at a site near Edmonton, Alberta -- 35.5. Numerical modelling to determine the effects of artesian bedrock conditions on gravimetric water contents in Lake Agassiz clay -- 35.6. Determination of groundwater age using CFCs at the Thornton well field, Woodstock, Ontario -- Session 36.1. An account of geotechnical risk and reliability -- 36.2. Risk in static and seismic slope stability evaluation. Session 36.3. Risk of landslide-generated tsunamis for the coast of British Columbia and Alaska -- 36.4. Carbon monoxide poisoning from blasting operations in construction works -- Session 37.1. Pilot test of a shatter trench concept -- 37.2. Pressure pulse technology (PPT): a revolutionary fluid flow technology for porous media -- 37.3. Freeze separation for treatment of salt-contaminated groundwater -- 37.4. Modelling the water budget for a peat filter using soilcover: a soil-atmosphere flux model -- Session 38.1. Case history of the design, construction and performance of a below-slab heating system -- 38.2. Abandonment and reclamation of the Steep Rock Iron Ore Mine at Atikokan and the related Hardy and West Arm No. 1 dams -- 38.3. Foundation design flexibility of re-usable, one-piece reinforced concrete arches -- 38.4. An internet-GIS based geotechnical data sharing and analysis system. Session 39.1. Performance of a pile in a layered system subjected to a seismic type base excitation -- 39.2. The numerical simulation of seismic surface waves -- 39.3. Influence of plasticity on the seismic behavior of tunnels -- 39.4. Simplified geostatistical analysis of earthquake induced ground response at the treasure island -- Session 40.1. Use of stable Pb, 180 and D isotopes for investigating acid rock drainage (ARD) at the Sullivan Mine, British

Columbia -- 40.2. Numerical simulations of acid rock drainage in the Sugar Shack south rock pile, Questa Mine, New Mexico, USA -- 40.3. Field investigation of natural attenuation of mine drainage-borne zinc in shallow soils over permafrost, central Yukon, Canada -- 40.4. Hydrogeochemistry of an unsaturated waste rock pile, Key Lake, Saskatchewan -- 40.5. Modeling field performance of sub-aerial tailings deposition. Session 40.6. Investigation of tailings resuspension under a shallow water cover -- 40.7. Wind-induced waves and resuspension in two mine tailings ponds -- 40.8. Unsaturated flow in layered cover systems: a comparison between numerical and field results -- 40.9. Field and laboratory characterization of a desulphurized tailings cover system.

**Title:** Use of a battery of biological tests to assess aquatic quality in Canadian prairie and northern watersheds / by B.J. Dutka ... [et al.].

**Library:** NEOS (includes U of Alberta)

**Authors:** Dutka, B. J.

**Publication Information:** Burlington, ON : National Water Research Institute, 1988.

**Physical Description:** 23, [13] leaves : ill., map ; 28 cm.

**Series:** NWRI contribution ; 88-107

**Notes:** Summary in English and French.

**Bibliography:** p. 22-23.

**Summary:** This report contains the results of an examination of water samples, water-extracted sediments and organically-extracted sediments from Western-Canadian lakes and rivers using the "battery of tests approach" to identify degraded waters. Study areas included the Saskatchewan and Qu'Appelle River Systems in Alberta and Saskatchewan, and the Churchill River diversion route in Burntwood, Footprint and the lower Nelson Rivers in Manitoba. Sites are ranked in order of greatest concern ("hot spots").

**Title:** Annual report / Northern Alberta Development Council.

**Library:** NEOS (includes U of Alberta)

**Corporate Name:** Northern Alberta Development Council.

**Electronic Access:** Materials Specified: UA Internet Access: 2000/2001-  
[http://www3.gov.ab.ca/nadc/Publications/publication\\_home.htm](http://www3.gov.ab.ca/nadc/Publications/publication_home.htm)

**Publication Information:** Edmonton : Northern Alberta Development Council.

**Physical Description:** v. : ill. (some col.) ; 23-28 cm.

**Frequency:** Annual

**Numbering::** [1st]-32nd, 1963-1995/96; 1996/97-

**Notes:** 43 2004 2005; 2002 2003; 2001 2002;  
 Suspended during 1972.  
 Vol. called 1973/74 covers 1973.  
 Vol. for 1975 designated as 10th but constitutes 12th.  
 Report year ends Mar. 31.

**Summary:** Summary of the activities of the Northern Alberta Development Council in areas such as research on economic development, health, water management and education. Includes map.

**ISSN:** 0383-3577

**Subjects:** Regional planning -- Alberta -- Periodicals.  
 Alberta -- Economic policy -- Periodicals.  
 Organizations as Subjects Northern Alberta Development Council

**Contents:** Session 1. Regulatory Tools: The approval process - views from all angles; The Environmental Appeals Board -- Session 2. Social Science: Growth and stewardship: exploring the natural capital policy challenges and opportunities facing Alberta municipalities; Sustainable resource and environmental management through Alberta's FireSmart Program -- Session 3. 2005 Flood Events and Water Infrastructure: June 2005 flooding - AENV response; The June 2005 floods in central and southern Alberta; The importance of an infrastructure management system -- Session 4. Perspectives on Oil Sands Region: Environmental management in Alberta's oil sand region; The importance of an infrastructure management system -- Session 5. Forest Ecology: The mountain pine beetle - scope of the problem and key issues in Alberta; The North Cabin Pipeline - a case study working together to balance resource development with environmental management; Wildlife movement corridor alteration from oil sands mining -- Session 6. Climate Change: The Montreal action plan: towards a new international climate change policy regime [sic] beyond 2012; Transportation and climate change - options for Alberta's future -- Session 7. Innovative Technologies: Facilitating environmental innovation, technology and research for a responsible western Canadian hydrocarbon energy industry; Petro-Canada reuses treated Edmonton wastewater -- Session 8. Emerging Issues and Responses on Wildlife: Caribou Landscape Management Association (CLMA) integrated planning model -- Session 9. Working Together for the Preservation of Alberta Parks: Fish Creek Provincial Park - innovations in urban green space and wetlands; For the love of Alberta's parks! -- Session 10. First Nations: Documentation and use of traditional environmental knowledge in oil sands mine planning -- Session 11. Integrated Land Management: Integrated Land Management Program (ILM); Managing human use in wildlife corridors - a case study in the Bow Valley, Alberta -- Session 12. Innovations in Waste Management: EWMCE - innovative partnership in waste management -- Session 13. Innovative Technologies: Sustainable buildings, Alberta Parks showcases LEED (trademark) certified buildings -- Session 14. Emerging Issues: No papers available -- Session 15. New Developments: Resilient forest management in Alberta - a new way of practice; EnviroVista, a program for environmental leaders -- Session 16.

Human Health and Wastewater Contaminants: Long-term human health assessment program following and [sic] accidental release of dioxins, furans and PCBs from Swan Hills Special Waste Treatment Centre 1996-2005; Out of sight, out of mind: pharmaceuticals, personal care products and other organic wastewater contaminants in Alberta surface waters -- Session 17. Focus on Partnerships: Regional environmental outcomes - a partnership approach for southern Alberta -- Session 18. Leading the Way: BC - Alberta environmental cooperation and harmonization; environmental management changes -- Session 19. Building Environmental Stewards: Affecting change - how do you encourage people to adopt sustainable behaviour; Growing together: partnerships in education; Examples of on-the-ground practice changes: AESA program successes in helping farmers & ranchers adopt environmentally sustainable agriculture practices; Alberta Water Quality Awareness Day -- Session 20. Focus on Agriculture: Developing soil phosphorus limits for Alberta's agricultural lands; Municipalities and the Agricultural Operation Practices Act (AOPA); Agriculture and Climate Information Service (ACIS) -- Session 21. Coalbed Methane - Challenge and Opportunities: Coalbed methane/natural gas in coal consultation process; Coalbed methane and groundwater; Planning coalbed methane drilling programs in environmentally sensitive areas - experiences from the Rumsey Natural Area -- Session 22: Sustainable Municipalities: Re-imagining the suburbs; Sustainable community design and development; ImagineCALGARY - a collaborative approach to developing urban sustainability strategies; Okotoks on purpose - a sustainable story -- Session 23. Focus on Water: Strategic needs for energy related water use technologies; Value of water to the Alberta economy; Town of Cochrane water conservation initiative - an important step toward watershed stewardship -- Session 24. Lake Wabamun: Situation and Response: Response to an oil spill on the shoreline of an important recreational lake in central Alberta; Alberta Environmental Protection Commission; The Lake Wabamun experience: shoreline assessment and other challenges -- Session 25. Building Environmental Stewards: Alberta's range resources management program; Every drop counts - an informed public starts with informed students -- Session 26. Focus on Lakes - Science and Stewardship: Alberta Lake Management Society - bridging the gap between academics, governments and local stewards; Alberta lakes - a legacy worth protecting -- Session 27. Leading the Way: Energy development and public safety; Greening the pages - Alberta Environment's move to responsible procurement practices -- Session 28. Biodiversity and Geology: What's up underground - appraising undiscovered earth resources for land planning and environmental stewardship at Alberta Geological Survey -- Session 29. Focus on Water Supply: Opportunistic operations of reservoirs in southern Alberta for environmental benefits; Solving Alberta's water supply shortfalls through enhanced - Panacea or fallacy? -- Session 30. Focus on Energy Development - Innovation and Cooperation: Upstream oil and gas

policy integration project; Canadian Clean Power Coalition - current status of clean coal studies -- Session 31. Alberta's Environment Industry: State of Alberta's environment industry and Alberta Economic Development's strategic industry focus -- Session 32. Leading the Way: CASA Flaring and Venting Project Team - from an Alberta problem to a world solution - - Session 33. Shared Governance of the Environment: Shared environmental governance -- Session 34. Irrigation - A Multi-faceted Activity: Irrigation is much more than agriculture -- Session 35. Focus on Water Management and Stewardship: Alberta Water Council -- Session 36. Leading the Way on Energy: Re-branding Alberta: Alberta's leadership role in energy policy.

**Contributors:** Shell Canada Limited.

Alberta Energy and Utilities Board.

Alberta. Alberta Environment.

Golder Associates.

Komex International Ltd.

Cantox Environmental Inc.

**Other Titles:** Application for approval of the Jackpine Mine - phase 1.

Aquatic resources environmental setting for Jackpine Mine - phase 1.

Athabasca oil sands regional resource use baseline.

Biodiversity environmental setting for Jackpine Mine - phase 1.

Closure drainage plan for Jackpine Mine - phase 1.

Conceptual no net loss plan for Jackpine Mine - phase 1.

Forestry environmental setting for Jackpine Mine - phase 1.

Historical resources impact assessment for Jackpine Mine - phase 1.

Invertebrate drift surveys in Muskeg and Shelley Creeks for Jackpine Mine - phase 1.

Hydrogeology environmental setting Jackpine Mine - phase 1.

Soil and terrain environmental setting report for Jackpine Mine - phase 1.

Surface water hydrology environmental setting for Jackpine Mine - phase 1.

Terrestrial vegetation and wetlands environmental setting report for Jackpine Mine - phase 1.

Traditional land use environmental setting report for Jackpine Mine - phase 1.

Water quality environmental setting report for Jackpine Mine - phase 1.

Wildlife environmental setting report for Jackpine Mine - phase 1.

Wildlife habitat modelling for Jackpine Mine - phase 1.

Surface water quality and human, aquatic biota and wildlife health for Jackpine Mine - phase 1.

Shell Canada Limited applications for an oil sands mine, bitumen extraction plant, cogeneration plant, and water pipeline in the Fort McMurray area.

**Notes:** At head of title: Application for approval of the.  
"May 2002."

English and French.

**Contents:** Keynote address. Limits of limit equilibrium analysis -- Session 1.1. Centrifuge modelling of pipeline frost heave -- 1.2. Geological controls on directionally drilled pipeline installations in northeastern Alberta -- 1.3. Horizontal directional drilling fluids from a geotechnical perspective -- 2.1. Well water quality in Canada: an overview -- 2.2. Hydrogeological investigations of municipal groundwater supply following the Walkerton e. coli tragedy -- 2.3. Microbiological quality of drinking water in Canada: an overview of the Health Canada programme -- 2.4. Changes in groundwater quality in an intensive agricultural area of southern Alberta, Canada. Session 3.1. Bioreactor landfill design and operation -- 3.2. A geographic information system (GIS) approach for quantifying source strength of methane gas at landfills -- 3.3. Hydraulic conductivity of compacted clay liners: field testing and data interpretation -- 3.4. Hydraulic conductivity of compacted clay liners at two Calgary landfill sites -- 4.1. From subsea to submerged floating tunnels -- 4.2. Boundary conditions in small-scaled tunnel excavation model -- 4.3. Ground response associated with a drill-and-blast shallow tunnel -- 4.4. 3-D analysis on the performance of a grouted tunnel. Session 5.1. Towards a regional hydrogeologic framework for groundwater development and conservation, Athabasca and Cold Lake oil sands areas, Alberta -- 5.2. The glacio-stratigraphic organization of tertiary and quaternary sediments in the Athabasca oilsands (in situ) area, Alberta: implications for groundwater exploration -- 5.3. A multidisciplinary approach to resolving complex hydrogeologic systems -- 5.4. Hydrogeology of the southeastern Athabasca area: challenges for bitumen production -- 5.5. Quaternary aquifer water level changes caused by stress changes -- 5.6. Study of chloride migration in Cold Lake, Alberta, Canada -- 5.7. Identifying the source of dissolved hydrocarbons in aquifers using stable carbon isotopes -- 5.8. Aquifer depressurization and dewatering at Syncrude's Aurora Mine - an update. Session 6.1. Pearl Harbor & Midway - lessons for geotechnical engineers -- 6.2. A case study: geoenvironmental site investigation for interchange area of Highway 15 and Trans Canada Highway 1, British Columbia -- 6.3. Baxter Bridge - a case with history -- 6.4. Effective rock blasting and vibration control program saves adjoining plant in southwest Florida - a case study -- 7.1. The future of Canadian gasoline additives from a groundwater perspective -- 7.2. Investigation of a creosote plume underneath a large tidally influenced river -- 7.3. Inhibitory effect of noncoliforms on total coliform enumeration in manure impacted groundwater -- 7.4. Identification of high-fluoride groundwater provinces, Alberta, Canada. Session 8.1. Detailed construction procedures and considerations in Syncrude's quasi-homogeneous earthfill dams -- 8.2. A geotechnical performance review of the Mildred Lake East Toe Berm -- 8.3. Monitoring the movements of Maroon Dam -- 8.4. Stability of dykes

at Seven Sisters generating station -- 9.1. Effect of plugging on pile performance -- 9.2. Interaction between end bearing and shaft-resistance of piles -- 9.3. Helical piles in soft sensitive soils - disturbance effects during pile installation -- 9.4. Performance of model tapered piles in sand. Session 10.1. Performance of a quasi-homogenous earthfill dam retaining 35 m of tailings fluid with no filters or clay core: Syncrude's highway berm -- 10.2. Investigation of groundwater flow within an oil sand tailings impoundment and environmental implications -- 10.3. Water balance for reclamation covers on oilsands mining overburden piles -- 10.4. Geotechnical aspects of several recent mine tailings impoundment failures -- 10.5. Evaluation des deformations d'un grand barrage en terre et en enrochement pendant sa mise en eau -- 11.1. Anisotropic fracture networks: a new evaluation methodology -- 11.2. Characterization of sheared joint surface degradation -- 11.3. Blast damage assessment at the Ekati[™] Diamond Mine -- 11.4. Swelling strains and movement rates in weak rocks. Session 12.1. Landslides, landslide dams, and the geomorphology of tributaries in the Peace River lowland, Alberta -- 12.2. Geomorphology and slope instability features in the Outardes delta area, Quebec, Canada -- 12.3. Slope stability - study of a real landslide in Tabriz -- 12.4. Slope stabilization using drilled shafts at CP Railway's track in southern Ontario -- 13.1. Field manifestations of gravity-driven regional flow of groundwater: theory, examples, and utilization -- 13.2. Exploring the dynamics of groundwater and climate interaction -- 13.3. Simulation of brine transport in heterogeneous media from a potash tailings pond -- 13.4. Measurement methods for evaporative fluxes over the short term. Session 14.1. The characterization of agricultural point source contaminants -- 14.2. Nitrate geochemistry of a regional aquifer in an agricultural landscape, Woodstock, Ontario -- 14.3. Groundwater transport of nutrients under an irrigated , manured field, southern Alberta -- 14.4. Groundwater nitrate concerns and nutrient management and groundwater protection programs in rural Ontario -- 14.5. Groundwater-surface water interaction and nitrate origin in municipal water supply aquifers, San Jose, Costa Rica -- 14.6. Hydraulic performance of a subsurface flow constructed wetland. Session 15.1. Effects of time on in situ test results after ground improvement - new insights from laboratory and field data -- 15.2. Maximized bearing capacity from a single geosynthetic reinforcement layer -- 15.3. Behaviour of full-scale reinforced embankments loaded to failure by a strip footing near the crest -- 15.4. Dynamic compaction of coarse-grained soils - a case history -- 15.5. Distribution of stresses and settlements below floor slabs supported by rammed aggregate piers -- 15.6. Settlement performance of shallow foundations on stone-column-improved ground -- 15.7. Reinforcement of soft cohesive soils with stone columns -- 15.8. Dynamic compaction of clay backfill in a former gravel pit for a tank farm -- 15.9. Plastic concrete elastic and viscoelastic behavior -- 15.10. Observations from grout field trials in outwash sands. Session 16.1. The multiple personalities of groundwater in modern

engineering and environmental practice -- 16.2. Aquifer vulnerability assessment: the first step in developing an aquifer management strategy for the City of Ottawa -- 16.3. Groundwater protection initiatives in Alberta -- 16.4. A regional groundwater management initiative for eastern Ontario -- 16.5. Alberta Environment's role in groundwater management in Alberta -- 16.6. A new method for calculating aquifer capability for subdivision applications. Session 17.1. The geotechnical virtual laboratory update - consolidation -- 17.2. Laboratory measurement of stresses in sand -- 17.3. Effects of aging on the strength characteristics of kaolin-cement mixture: laboratory program and preliminary results -- 17.4. Elastic-plastic deformation of dense sand at high pressure and elevated temperature -- 17.5. One-dimensional soil compression curves: mathematical description -- 17.6. Influence of particle breakage on mechanical behavior of assemblies of two-dimensional polygon-shaped particles -- 17.7. A simple experimental procedure for determining the fitting parameter,  $k$  for predicting the shear strength of an unsaturated soil. Session 18.1. Characterization of monitored natural attenuation at upstream oil and gas sites in western Canada -- 18.2. Biological activity assessment to support monitored natural attenuation at upstream oil and gas sites in Alberta -- 18.3. Natural attenuation processes in a hydrocarbon-impacted wetland -- 18.4. Natural attenuation of nitroaromatic compounds in soils and groundwater at a production plant -- 18.5. Monitored natural attenuation of diesel fuel contaminating groundwater in a bedrock formation -- 18.6. Evaluation of two techniques to estimate the mass flux of contaminants in groundwater -- Session 19.1. A proposed method for evaluating  $K_o$  in fine grained soils using CPT pore pressure measurements -- 19.2. Reduced scale testing of reinforced soil retaining walls with non-select fills. Session 19.3. The influence of reinforcement stiffness on the performance of full-scale reinforced soil segmental retaining walls -- 19.4. About applications of the dilatometer test in southwestern Ontario soils -- 19.5. Ground interaction effects in uplift pile load tests -- 19.6. Strain localization at interfaces -- Session 20.1. Costa-Canada, a Canadian contribution to the study of continental slope stability: an overview -- 20.2. High-resolution three-dimensional seismic surveying of submarine landslides: rationale and challenges -- 20.3. Submarine failures in the Strait of Georgia, British Columbia: landslides of the 1946 Vancouver Island earthquake -- 20.4. Caractérisation préliminaire du glissement sous-marin de la Pointe-du-Fort, Fjord du Saguenay, Québec Canada -- 20.5. The efficiency of a catastrophic capping layer deposited in the Saguenay Fjord during the flood of 1996, Québec. Session 20.6. The Saguenay Fjord: integrating marine geotechnical and geophysical data for spatial slope stability hazard analysis -- 20.7. Caractéristiques géotechniques et analyse du potentiel de liquéfaction des sédiments récents et post-glaciaires du Fjord du Saguenay, Québec (Canada) -- 20.8. Slope instability seismic signatures in the quaternary sediments of the St-Lawrence Estuary (Qc. Canada) -- 20.9. Revue et investigation complémentaire du site du glissement de Saint-

Jean-Vianney -- 20.10. Simulating submarine slope instability initiation using centrifuge model testing -- 20.11. Backanalysis of the 1929 Grand Banks submarine slope failure -- 20.12. Le glissement du hudson apron: un exemple d'application de la caracterisation geomecanique des mouvements de masse. Session 21.1. Flow and transport in the capillary fringe with and without surfactant effects -- 21.2. Numerical modeling of three-dimensional variably-saturated flow and transport of dissolved energetic material at an anti-tank range -- 21.3. Role of soil fractions on the contaminant migration in clay barrier -- 21.4. LNAPL migration through heterogeneous media under fluctuating water table conditions -- Session 22.1. Assessing construction and settlement-induced building damage -- 22.2. Horizontal earth pressures for a deep excavation in downtown Calgary -- 22.3. Construction induced settlement of adjacent buildings -- 22.4. A method for the symmetrical foundation plinth calculation -- Session 23.1. A framework for interpretation of instability of slope -- 23.2. A procedure to compare the results of dynamic and pseudo-static slope stability analysis. Session 23.3. Examination of instability in an unsaturated highway cut -- 23.4. Design and installation of Geobrug's Pentifix system for slope stabilization -- Session 24.1. Climate change, permafrost degradation and impacts on infrastructure: two case studies in the Mackenzie Valley -- 24.2. Geotechnical analysis of a frozen tailings dike -- 24.3. Development and application of frozen till dam core drilling method using a refrigerated fluid -- 24.4. Computation of frost table profile using green theorem -- Session 25.1. Time-lapse electrical resistivity monitoring of groundwater remediation -- 25.2. The verification of electrical resistivity imaging in the study of saline and fresh groundwater interaction at Lydden Lake, SK -- 25.3. Deriving Waxman-Smits parameters for estimating groundwater quality from in-situ electrical conductivity measurements -- 25.4. Soil characterization using static conductivity and permittivity. Session 25.5. Four electrode method for indirect measurement of soil moisture -- 25.6. Detecting ionic contaminants in water using complex permittivity -- 25.7. The use of ground penetrating radar to monitor transient water content changes during an unconfined aquifer pumping test -- 25.8. Rural water supply project: Malawi, Africa -- Session 26.1. Numerical analysis of pressuremeter test data with reference to intermediate principal stress, anisotropy and dilatancy -- 26.2. Residual deformation characteristics of sandy soils under cyclic simple shear -- 26.3. The dynamic property of Ger'ermu wind carried sand -- 26.4. The effect of drainage conditions on liquefaction response of sands -- Session 27.1. Interpretation of an aquifer test at La Grande 1 hydroelectrical project, La Grande complex, Quebec -- 27.2. Essai de pompage dans un aquifere confine soumis a des effets de maree (pumping test in a confined aquifer influenced by tidal waves). Session 27.3. Analytical solutions for two dimensional steady flow systems through concentric circles of inhomogeneous media -- 27.4. Fuzzy image method for unsteady well near a linear boundary -- Session

28.1. Investigation of hydraulic properties of regional fractured rock aquifers -- 28.2. Regional groundwater hydrogeochemistry of fractured rock aquifers in south-western Quebec -- 28.3. Groundwater recharge of fractured rock aquifers in south-western Quebec -- 28.4. Experimental study on the hydraulic, chemical and mechanical processes in rock fractures from a mine site -- Session 29.1. Imaging subsurface seepage conditions through the modelling of streaming potential -- 29.2. A spatial flux boundary model for tailings dams -- 29.3. Effects of shear strength anisotropy on stability of earth structures -- 29.4. Development of a spreadsheet for modelling SPT stress wave data. Session 29.5. Application of double-shearing model in deep excavation analysis -- 29.6. Modelisation numerique des ecoulements non satures et theorie des similitudes -- Session 30.1. Large diameter wells for groundwater remediation -- 30.2. Innovative full-scale soil and groundwater remediation at a mall dry cleaners -- 30.3. TCE recovery during in situ flushing: experimental study of the controlling parameters -- 30.4. TCE recovery mechanisms with alcohol and surfactant washing solutions in sand columns -- 30.5. A laboratory study on the degradation of gasoline contamination using Fenton's reagent -- 30.6. Effect of pH enhancement in efficiency of electrokinetic decontamination -- 30.7. Electrokinetic removal of precipitated lead from carbonate-rich illite soil -- 30.8. Using nitroaromatic compounds to investigate the reactivity of carbon on master builders granular iron: implications for contaminant degradation in permeable reactive barriers. Session 30.9. Laboratory investigations of aerobic and anaerobic monoethanolamine biodegradation -- 30.10. Evaluation of intrinsic bioremediation of btex and chlorinated solvents at an old landfill in Cold Lake, Alberta -- Session 31.1. Effects of viscous behaviour of soft foundation soils on reinforced embankments -- 31.2. Flow liquefaction of loose gassy sand under monotonic loading - an effective stress approach -- 31.3. Estimating the in-situ cohesion of Tehran coarse grained cemented alluviums -- 31.4. Determining the stress history of overconsolidated glaciomarine clay; an oedometer test study -- 31.5. Geomechanical behaviour of stiff clays and mudstones as caprocks for geological sequestration of CO<sub>2</sub> -- 31.6. Estimating liquefaction-induced lateral displacements for level ground with a free face from SPT or CPT data. Session 32.1. A review and assessment of the carbon geochemistry and hydrogeological characteristics of a coalbed methane exploration area, SE British Columbia -- 32.2. Numerical modelling of a saline plume in the Mannville Group aquifer, Alberta basin -- 32.3. Origin of anomalous high sulphate groundwater in the carbonate rock aquifer - southern Manitoba -- 32.4. Uranium depositional controls at the Prairie Flats surficial uranium deposit, Summerland, British Columbia -- 32.5. Using isotopic and geochemical characteristics of groundwater to determine the extent of denitrification under a manured field in southern Alberta, Canada -- 32.6. Soil and groundwater characteristics of CFB Shilo ranges, Manitoba -- Session 33.1. Full scale tests on grillage anchor foundations for high

voltage transmission lines -- 33.2. Foundation design in floodplain geology at Canmore, Alberta. Session 33.3. Dynamic response analysis of foundations for vibration-sensitive equipment -- 33.4. Deflection (strain) based haul road designs -- 33.5. Installation of sensors and measurement of soil suction below thin membrane surface pavements in Saskatchewan -- 33.6. Recycling of shredded rubber tires as road base in Manitoba: a case study -- Session 34.1. Challenges in sustaining water well infrastructure on the Canadian prairies -- 34.2. Comparative study of methods for well head protection area delineation in fractured rocks -- 34.3. Defaults de scellement des piezometres, courts-circuits hydrauliques et consequences (inadequate sealing of monitoring wells, hydraulic short-circuits and consequences) -- 34.4. Effects of purging on groundwater analyses: a case study in Alberta -- 34.5. The applicability of shock chlorination to reduce coliform exposure in drinking water wells. Session 34.6. Groundwater aspects of Canadian assisted development, Tibet -- Session 35.1. Conceptual model for the structurally complex, bedrock-controlled groundwater flow system on the southern Gulf Islands, British Columbia -- 35.2. The role of groundwater in the montane ecoregion, Canmore corridor, Alberta -- 35.3. Focused groundwater recharge under micro depressions on hummocky terrain -- 35.4. Variability in the barometric efficiency of quaternary till deposits at a site near Edmonton, Alberta -- 35.5. Numerical modelling to determine the effects of artesian bedrock conditions on gravimetric water contents in Lake Agassiz clay -- 35.6. Determination of groundwater age using CFCs at the Thornton well field, Woodstock, Ontario -- Session 36.1. An account of geotechnical risk and reliability -- 36.2. Risk in static and seismic slope stability evaluation. Session 36.3. Risk of landslide-generated tsunamis for the coast of British Columbia and Alaska -- 36.4. Carbon monoxide poisoning from blasting operations in construction works -- Session 37.1. Pilot test of a shatter trench concept -- 37.2. Pressure pulse technology (PPT): a revolutionary fluid flow technology for porous media -- 37.3. Freeze separation for treatment of salt-contaminated groundwater -- 37.4. Modelling the water budget for a peat filter using soilcover: a soil-atmosphere flux model -- Session 38.1. Case history of the design, construction and performance of a below-slab heating system -- 38.2. Abandonment and reclamation of the Steep Rock Iron Ore Mine at Atikokan and the related Hardy and West Arm No. 1 dams -- 38.3. Foundation design flexibility of re-usable, one-piece reinforced concrete arches -- 38.4. An internet-GIS based geotechnical data sharing and analysis system. Session 39.1. Performance of a pile in a layered system subjected to a seismic type base excitation -- 39.2. The numerical simulation of seismic surface waves -- 39.3. Influence of plasticity on the seismic behavior of tunnels -- 39.4. Simplified geostatistical analysis of earthquake induced ground response at the treasure island -- Session 40.1. Use of stable Pb, 180 and D isotopes for investigating acid rock drainage (ARD) at the Sullivan Mine, British Columbia -- 40.2. Numerical simulations of acid rock drainage in the

Sugar Shack south rock pile, Questa Mine, New Mexico, USA -- 40.3.  
Field investigation of natural attenuation of mine drainage-borne zinc in shallow soils over permafrost, central Yukon, Canada -- 40.4.  
Hydrogeochemistry of an unsaturated waste rock pile, Key Lake, Saskatchewan -- 40.5. Modeling field performance of sub-aerial tailings deposition. Session 40.6. Investigation of tailings resuspension under a shallow water cover -- 40.7. Wind-induced waves and resuspension in two mine tailings ponds -- 40.8. Unsaturated flow in layered cover systems: a comparison between numerical and field results -- 40.9. Field and laboratory characterization of a desulphurized tailings cover system.

 An ecological inventory of shorelines of selected lakes in the Cold Lake region.  
 A trophic assessment of nine lakes in the Cold Lake Region : interim report.  
 An approach for assessing the impact of lake level fluctuations on lake trophic status.  
 River water quality assessment : Cold Lake - Beaver River regional water resources study water quality component.

**Notes:** Submitted by Alberta Environment, Water Resources, Management Services to Hon. F. Bradley, Minister of Environment.  
 V.2 has 4 folded maps in pockets.

**Contents:** V. 1: Main report -- v.2: Water supply; App.A. Beaver River Cold Lake report; App.B. Ground-water resources, Cold Lake - Beaver River Basin; App.C. A modelling study of groundwater allocation in the Cold Lake - Beaver River Basin -- v.3: Withdrawal demand and assessment; App.D. Withdrawal water demands Cold-Lake Beaver River Basin; App.E. Beaver River-Cold Lake regional water resources study water balance model -- v.4: Fisheries; App.F. Fisheries studies Cold Lake-Beaver River study area: volume I review of the potential effects of water level fluctuation on fish populations in waterbodies in the Cold Lake Region; App.G. Fisheries studies Cold Lake-Beaver River: volume II detailed data

report. V.5: Fisheries and wildlife; App.H. The fish and fisheries of the Cold Lake - Beaver River Basin: their status and utilization; App.I. Water related wildlife resources in the Beaver River Watershed -- v.6: Recreation; App.J. Water based recreation - Final report - Cold Lake-Beaver River regional water resources study -- v.7: Ecological inventory of lake shorelines; App.K&L. An ecological inventory of shorelines of selected lakes in the Cold Lake Region, volume I and II -- v.8: Water quality; App.M. A trophic assessment of nine lakes in the Cold Lake Region - interim report; App.N. An approach for assessing the impact of lake level fluctuations on lake trophic status; App.O. River water quality assessment - Cold Lake-Beaver River regional water resources study water quality component.
